web site: www.weldingwire.com or www.weldingrod.com

12-2016

This letter verifies that the following welding products from Washington Alloy Co. are in compliance with the RoHS (Restriction of Hazardous Substance)

Welding alloys including flux and metal cored
Brazing and Soldering fluxes

This applies to all filler metals with the exception of lead solders and the cadmium bearing silver brazing products.

The RoHS compliant requires that all homogenous materials supplied shall not contain any of the following substances in excess of the following maximum values by weight:

- 1) 0.1% for lead, mercury, hexavalent chromium, polybrominated diphenyl ethers or polybrominated biphenyls*
- 2) 0.01% cadmium*

Some of the products supplied as well as base metals may contain the element chromium that can produce hexavalent chromium during the welding process.

Quality Products and Service From the Quality Supplier

Washington Alloy Company believes that all information and data given is correct.
